The authors regret that under heading 4.4, we incorrectly stated, “*Studies conducted on Magellanic penguins have failed to identify significant impacts on foraging behaviour or reproductive success, but found elevated mortality particularly on the first-year post-banding (Boersma and Rebstock, 2009, 2010)*”.

This sentence should have read: Studies have failed to identify significant impacts on foraging behaviour or reproductive success

in banded Magellanic penguins (Boersma and Rebstock, 2009, 2010).

We note that this mis-quote does not affect our results in any way.

The authors would like to apologise for any inconvenience caused.
